## BLUE NITRO CLEANER

NOVEMBER 15, 1993

### PRODUCT DESCRIPTION

#### CONTENTS

Blue Nitro Cleaner is a heavy duty liquid, industrial cleaner formulated for cleaning most surfaces. Completely biodegradable. Caustic odor.

#### USES

Provides effective removal of all commonly encountered oils, greases and other contaminants from concrete, wood, asphalt and metallic surfaces other than polished or anodized aluminum. Cleans engines, motor parts and over-the-road vehicle exteriors.

#### ADVANTAGES

Provides excellent surface cleaning preparation prior to Matrix Mix application. May be diluted with water (except for Matrix application surfaces) or used in concentrated form depending on contaminants being removed. Excellent long-term cleaning agent for Perma • Seal Sealer Stain surfaces.

### TECHNICAL DATA

#### CHARACTERISTICS

Color:	Dark Blue
Package:	5 Gal. Pail
Coverage:	200' Per Gal. (Undiluted)
Solvent:	Water
Boiling Point:	-220°F
Specific Gravity:	1.0
Odor:	Slight Butyl
Wt. Per Pail:	45lbs.
Flammability:	Slight
VOC:	4 g/l
Shelf Life:	1 Year Min.
Class:	2,1,0,B

#### COMPOSITION

Sodium Metasilicate:	Proprietary
Ethylene Glycol Monobutyl Ether:	Proprietary
Sodium Dodecylbenzene Sulfonate:	Proprietary
Additives:	<u>Proprietary</u> 100%

### PRODUCT APPLICATION

#### SURFACES

Apply to concrete, masonry, metal, wood, glass or asphalt. NOTE: Avoid polished or anodized aluminum.

#### PREPARATION

Apply directly to contaminated surface. Do not use in conjunction with other cleaners. Dilute as needed.

#### APPLICATION

Apply to dry surface from the bottom up. Wash from the bottom up and rinse from the top down. Apply with automatic scrubber, steam or high pressure washer as well as mops, sponges or brushes. NOTE: Do not allow to dry on surface before rinsing thoroughly.

#### CLEAN-UP

Clean application tools and equipment with detergent and water.
